ADDITIONAL INFORMATION SUPPORTING NJD: Wetlands C and D are small isolated man-made depressions that have been excavated deep enough to be close to the water table and develop into emergent and scrub wetlands. However, they have no apparent surface water connection with any other water of the United States. In addition they are not subject to boating and are not open to the general public for use. Based on Solid Waste Agency of Northern Cook County v. US Army Corps of Engineers (531 US 159 (2001)), isolated, non-navigable intrastate waters are not jurisdictional under the Clean water Act if the sole interstate commerce nexus is the use of such waters by migratory birds or other factors in the Migratory Bird Rule, therefore Wetlands C and D are not jurisdictional.
